## A BanksBoard

Divers and water/wilderness adventurers coast to coast agree that BanksBoard is the one piece of equipment you can't do without. This is an investment that will continue to enhance your diving experience year after year. It's a versatile floating companion with multiple applications for water enthusiasts.

### Features

We understand your ocean requirements and provide a quality product that works. Our boards travel well and ensure that you have what you need when you need it.

#### Strong and Safe

Our boards can hold up to 108 lbs of weight and only weigh only 13 lbs fully outfitted. All boards come with an easy to install flag - it mounts in one of the front vent holes making you easily visible while in the ocean.

#### Maneuverable

Need to travel with your board? No problem. The board contains a molded handle for easy towing and transportation; it also comes with detachable backpack straps that allow for easy carry when on land.

#### Secure

Two mesh sections zip up to hold and contain whatever you need. Tie downs offer additional security, two molded-in gun bays with simple and secure tie-downs mean your spear gun is easily accessible and ready when you need it.

## The most eco friendly way to eat

There's something about taking a deep breath and descending into the blue. It's so peaceful and amazing down deep and what a thrill to hunt and provide for friends and family. The right gear makes this sport happen for me...

[READ MORE](#)

## Who needs a BanksBoard?

Ocean lovers - Spear fisherman, free divers, sw+ampers and kayakers all find our board to be their favorite piece of equipment - it's been dubbed the one thing I can't go without.

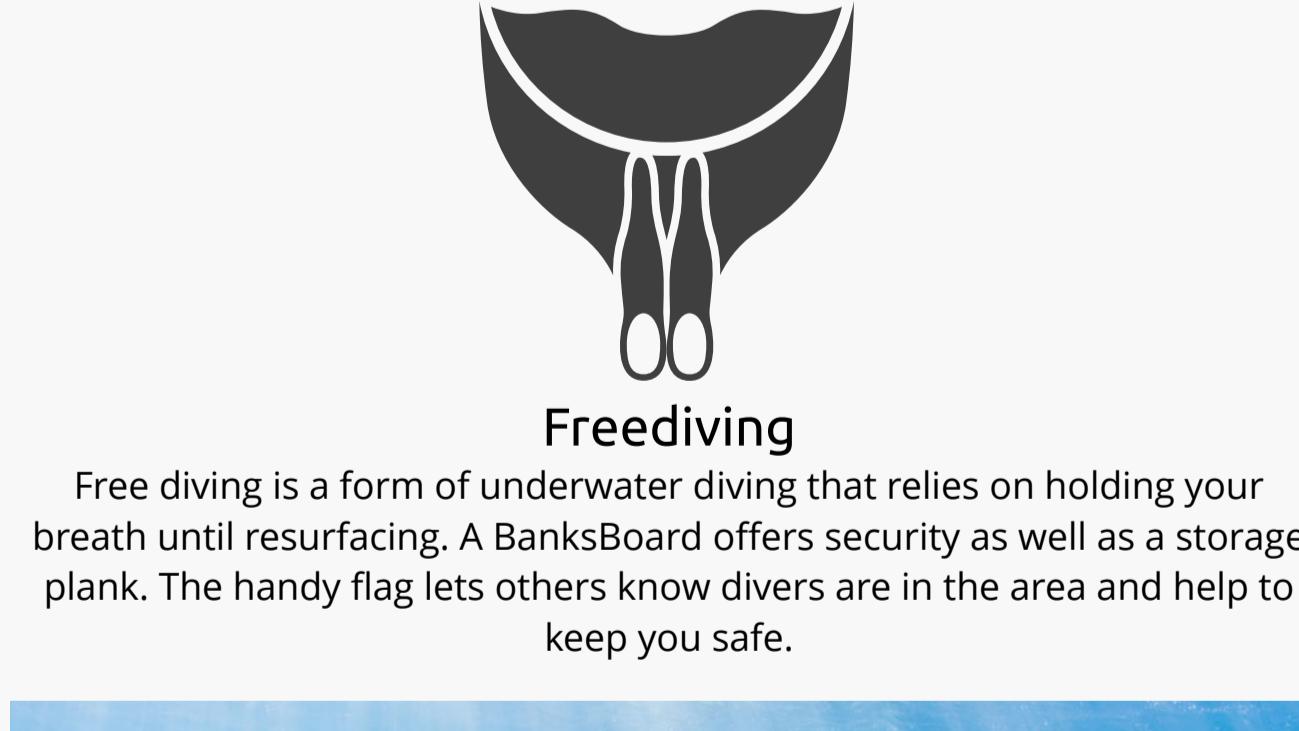

#### Sw+ampers

Swamping is a combination of swimming and camping. Wilderness enthusiasts tow the BanksBoard behind them with all of their necessary gear (securely stored) and are always ready for open ocean adventure.

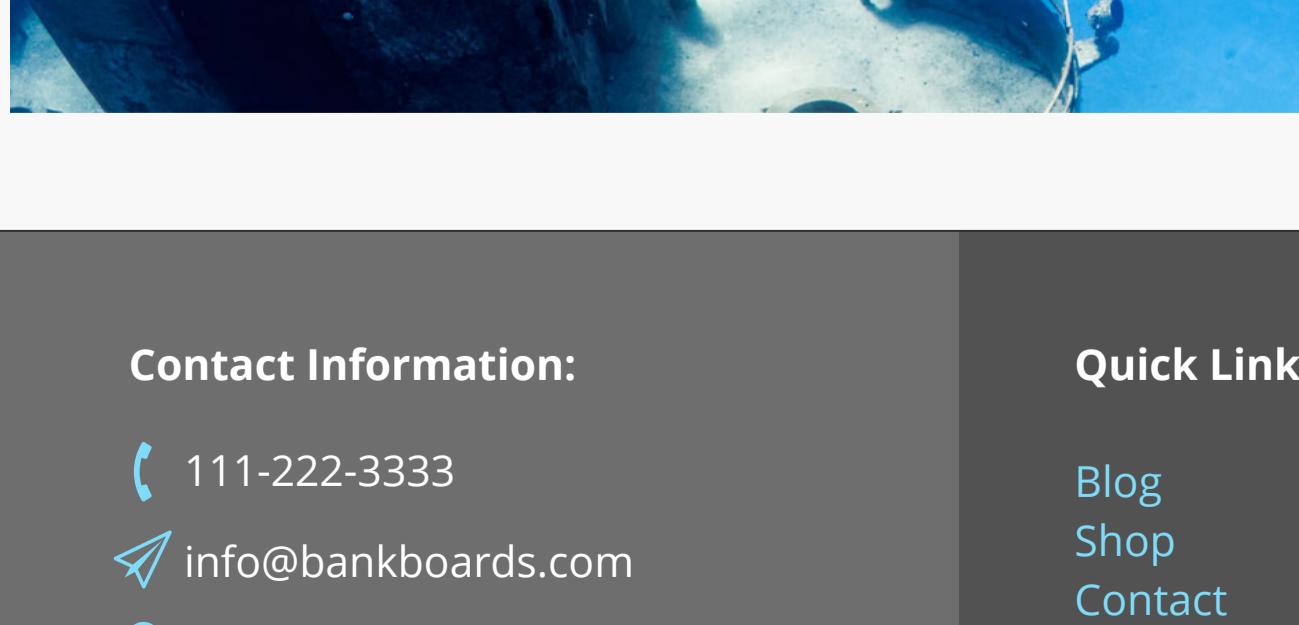

#### Spearfishing

Spearfishing is an ancient art - the ability to take a breath, dive down, and hunt for your meal. A BanksBoard is the perfect way to store your catch. It is securely placed in the net storage and kept away from other predators.

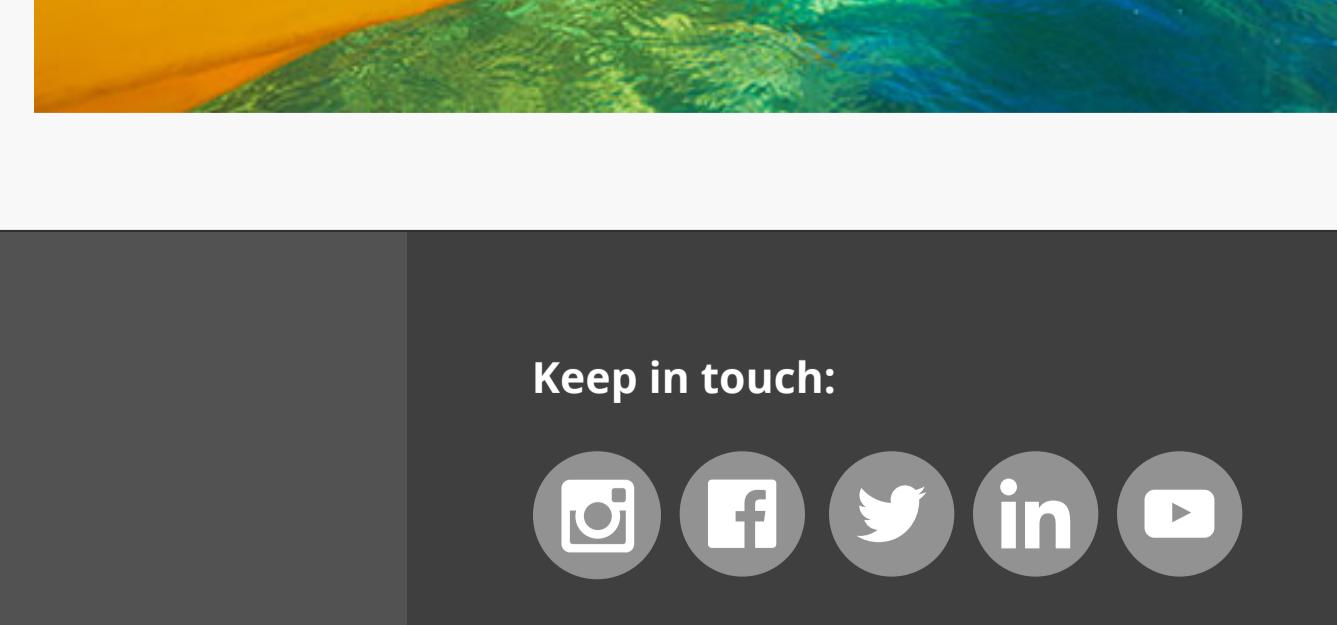

#### Freediving

Free diving is a form of underwater diving that relies on holding your breath until resurfacing. A BanksBoard offers security as well as a storage plank. The handy flag lets others know divers are in the area and help to keep you safe.

#### Kayaking

Give yourself more room on your kayak by towing the Banks board; it provides needed gear storage for camping trips, and has limitless fishing applications. With an easy tow rope mount you can bring what ever you may need.

# Our team dreamed big and came up with a solution

## Our story

We are ocean enthusiasts, we are adventure seekers, we are dreamers, we wanted something that didn't exist, so we made it. It took a few years, lots of drawings, planning and a ton of in-the-field testing. Luckily Gregg is an engineer and Milia is a creative visionary - we came together and made something great! Today we have produced a boat load of BanksBoards and each one floats. It meets our high standards and is something we are proud of. Try a board, we know you will love it!

## Our team

We understand your needs, not only do we make the boards here in the USA, but we also use the boards. We are continually striving to find new uses and to improve our boards. Have an idea or a need? Let us know, we would love to hear from you!

**Gregg Mason**  
Founder & CEO

**Malia Sonders**
